LOGIQ P Series

+ PERSONALIZED

workflow tools and automation to help you increase everyday efficiency.

+ PATIENT-CENTRIC

diagnostic capabilities with the flexibility to manage simple to complex cases.

+ POWERFUL

support to help optimize system uptime, utilization and user skills.

Introducing the **LOGIQ™ P Series**, providing advanced capabilities at a budget-friendly price

MULTI-PURPOSE

Clinical flexibility for a wide range of exams, including liver, cardiac, OB/GYN, breast, thyroid, musculoskeletal, urologic, vascular and pediatric studies

- High-quality images with extensive choice of probes
- Advanced imaging and visualization tools, including 2D Shear Wave Elastography, CEUS, UGAP, B-Flow™ and B-Flow Color, and Cardiac Strain
- Industry-leading cybersecurity, data management, and educational resources

Exceptional image quality and workflow efficiency to support clinicians in guiding needles and ablation devices, localizing anatomy and pathology, and monitoring procedures

- CEUS for pre- and post-ablation lesion assessment
- Enhanced B-Steer+ with dynamic FOV, needle recognition, and up to eight selectable steering angles
- Volume Navigation Import to view prior studies in real time via split screen
- Touch Control to zoom, magnify, and freeze images
- Remote Control from an Android™ phone or tablet

High-quality imaging and robust tools to assist clinicians in detecting and characterizing breast disease, especially in women with dense tissue

- 2D Shear Wave Elastography now available on multiple probes
- Automated Workflow Tools, including Measure Assistant and Compare Assistant
- Breast Assistant, powered by Koios DS™, an AI-based decision support tool that provides a quantitative risk assessment aligned to a BI-RADS® category¹

MUSCULOSKELETAL

High-quality, efficient imaging to assist clinicians in managing a wide range of musculoskeletal conditions and a high volume of patients

- Enhanced B-Steer+ with dynamic FOV, needle recognition, and up to eight selectable steering angles
- 2D Shear Wave Elastography now available on multiple probes
- Photo Assistant App to acquire and send photos of relevant anatomy from an Android device
- Seven dedicated musculoskeletal models and measurements

High-quality images and advanced tools to manage a wide range of patients, from newborns to young adults

- B-Flow with HD Color provides sensitivity for imaging small vessels and slow flow states
- Enhanced B-Steer+ helps improve speed and confidence for needle procedures on pediatric patients
- Start Assistant automatically launches the preferred setting, helping to ensure high quality exams
- Scan Assistant helps to reduce keystrokes and exam times
