# Women's Health

At **Voluson™** we are continuously innovating to improve image quality and create specialized clinical tools to help you see more anatomical detail with greater certainty, enabling you to provide the best possible patient care.

## AT A GLANCE:

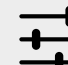

**GE HealthCare  
Voluson**

**Voluson Club**

**Women's  
Health Portal**

**Voluson  
Configurator**

# Voluson Expert 22

## You set the limits

The **Voluson™ Expert 22** is a premium imaging platform that combines extraordinary image quality with our superb volume ultrasound technology. The Voluson Expert 22 is for clinical trailblazers who want to continue to set new limits in women's healthcare.

Our powerful and adaptive Lyric Architecture combined with unmatched probe technology and progressive imaging tools will help find answers to complex cases earlier.

The classic, modern Voluson design with AI features supports efficient workflow increasing satisfaction and daily activities. All this combined with support excellence in service, education, and security.

**The Voluson Expert 22, for pioneers. For groundbreakers. Because like you, we don't just hope for a healthier future for women. We insist on creating it**

### Available features:

Lyric Architecture - Graphic Based Beamforming

High Definition Ultrasound (HDU) 23.8" Monitor

Radiantflow, SlowflowHD, and Slowflow3D

Advanced VCI with OmniView

HDLive™ Technology

Radiant, UltraHD and Augment

Uterine Trace

Advanced STIC & eSTIC

Advanced Fetal Echo

fetalHQ

SonoFHR

AI based image guidance SonoLyst

AI based functionality with fetalHS, SonoCNS, SonoPelvicFloor

Automation Technology with SonoBiometry, SonoNT, SonoIT, SonoAVC*follicle*

XDclear™ Probes

Volume Matrix Technology

High Frequency Transvaginal Imaging

Electronic 4D Technology

3D Printing Capabilities

# Voluson E10

The excellence you demand the standards you set

Your women's health practice is where complex cases are the rule, not the exception. Where patients demand your expertise, and trust you for answers.

With the **Voluson™ E10** you can deliver truly exceptional care – confidently and efficiently – every time – keeping you at the forefront of women's healthcare.

The Voluson E10 encompasses the most advanced imaging capabilities combined with efficiency and security features to help you to provide confident patient answers, faster.

## Radiance System Architecture

Display extraordinary image detail through sophisticated beam formation and powerful processing

**4x**

Ultrasound pathways for spectacular 2D and 3D/4D images with increased penetration and clarity

**10x**

Data transfer rate for higher resolution and very fast frame rates

**4x**

Processing power for advanced applications and efficient workflow

### Available features:

High Resolution 23" LCD LED or 22" OLED Display

Radiance System Architecture

Advanced 4D

HDlive™ Technology

Advanced VCI

SonoBiometry

SonoAVC™*follicle*

SonoVCAD™*heart*

Advanced STIC

eSTIC

Advanced Fetal Echo

*fetalHQ*

Steerable CW

Bi-Plane Mode

Anatomical M-Mode

Wide-sector

Coded Contrast Imaging\*

Scan Assistant

SonoNT™

SonoIT

Compression & Shearwave Elastography

Elastography Analysis

Elastography Ratio Measurement

B-Flow™

Radiantflow™

SlowflowHD

SonoRenderlive

Electronic Matrix Array Volume Technology

High Performance Transvaginal Probe

Electronic Height Adjustment

Floating User Interface

Slowflow3D (NEW on BT21)

eM6C Probe

RM7C XDclear™ Volume Probe (NEW on BT21)

L8-18i Linear Probe (NEW on BT21)

\* Not for sale in the USA. Not approved or cleared by the U.S. FDA. Features availability may vary from country to country. Check with a GE HealthCare local representative for detailed information.

# Voluson E8

## Advanced features, simplified workflow

As your patient volume increases and your clinical cases become more complex, you will require an ultrasound system that enables you to deliver truly exceptional care – confidently and efficiently – every time.

The **Voluson™ E8** ultrasound system is designed to keep pace with busy practices – handling routine to complex women's health exams with ease and precision. The premium image quality of the Voluson E8 combined with access to advanced capabilities, delivers the level of performance required by you and your patients.

### Available features:

Innovative user interface with high resolution 12.1" LCD touch panel

B-Mode

M-Mode

PW-Doppler

CFM (Color Flow Doppler Mode)

Automatic Optimization (B-Mode, PW Doppler)

Auto TGC

AutoScale

Coded Harmonic Imaging with Pulse Inversion Technology, operating on multiple frequencies, with user selectable on/off button

Coded Excitation (CE)

HD-Flow™ & Power Doppler Mode

B-Flow™

Radiantflow™

Tissue Doppler & PW-Tissue Doppler

XTD

SRI II (Speckle Reduction Imaging)

HDlive™ Silhouette, HDlive Flow, HDlive Studio

CrossXBeamCRI (Compound Resolution Imaging)

SonoBiometry (HC, BPD, AC, FL, HL)

SonoNT™ & SonoIT

SonoCNS

SonoRenderlive

Scan Assistant

DICOM® 3.0 Connectivity

Static 3D Mode

Focus and Frequency Composite (FFC)

HD-Zoom & Pan Zoom

Steering

Virtual convex

Wide-sector

BetaView

Histogram Analysis with up to 3 user adjustable ROIs with comparative analysis on complex curves

Patient information database

Image Archive on hard drive

3D/4D data compression (lossy/lossless)

Inversion Mode

Real-Time automatic Doppler calculations

Measurement, Calculations and Worksheets/Report

Multigestational Calculations

Integrated uplink for Cloud-based data storage (Tricefy™)\*

GYN IOTA LR2, Simple Rules and ADNEX Model\*

GYN IETA Protocol & Report\*

GYN IDEA Protocol & Scan Assistant Guideline

\* Not for sale in the USA. Not approved or cleared by the U.S. FDA. Features availability may vary from country to country. Check with a GE HealthCare local representative for detailed information. # Voluson S10 Expert

Your expertise, enhanced by innovation

Handling routine to complex cases, you develop a reputation for excellence in women's health. The **Voluson™ S10 Expert** helps provide you more of what you need with advanced imaging capabilities, opening new pathways to clinical growth. With the powerful Voluson Core Architecture and access to expert clinical tools, this ultrasound system is as forward-thinking as your practice.

Combined with proven innovation and true investment value, the Voluson S10 Expert will keep your practice at the forefront of women's health and empower you to provide the best imaging for the care of your patients.

## Available features:

Innovative user interface with high resolution 10.1" LCD touch panel

4 Active Probe Ports

Gel Holder

Horizontal Endocavity Probe Holder

B-Mode

M-Mode

PW-Doppler

CFM (Color Flow Doppler Mode)

HD-Flow™ & Power Doppler Mode

Tissue Doppler

B-Flow™

Radiantflow™

HDlive™ (requires 3D/4D package)

Coded Harmonic Imaging with Pulse Inversion Technology

# Voluson S10

## Your standards beyond your expectations

The range of women's healthcare needs is broad. From maternal and fetal health to gynecological care, the **Voluson™ S10** will ensure your practice is ready for any patient and any complexity. Voluson's extraordinary image quality, advanced clinical tools, and intelligent workflow enable high quality, efficient care, even under demanding conditions.

The Voluson S10 offers expert capabilities to expand your clinical capabilities and your practice, to build a healthier community.

### Available features:

# Voluson S8 Touch / Voluson S8

Your unique demands require distinct answers

Busy practices encounter two truths: time is a limitation and ultrasound is a key imaging tool. With its effortless workflow and superior image quality, the **Voluson™ S8** helps you obtain critical answers with clarity and speed to help streamline imaging procedures.

Reduce time spent on image acquisition, analysis, and reporting with this vital device's sleek ergonomic design, built-in automation and sophisticated software tools.

Spend more time with your patients and your staff, building trust and practice growth

# Voluson P8

## The powerful Voluson Core Architecture

Simply place the probe to get the information you need, without time-consuming modifications.

Built on **Voluson™ Core Architecture**, the Voluson Performance Series delivers excellent clinical images across all types of patients, quickly and easily.

Superb clarity and detail resolution in 2D images

Expand clinical confidence with 3D/4D technology by gaining views not possible with 2D for another anatomical perspective

Superb sensitivity into anatomy and function with Advanced Color Doppler Consistent imaging even in difficult-to-image patients with exceptional penetration

### Available features:

Lightweight and portable

17" High Resolution LED Flat Panel Screen

# Voluson SWIFT

This changes everything – again.

We introduced Voluson™ SWIFT to address your biggest challenges: complex features and workflow, lack of time and a system that didn't fit how you work. Now with BT23 we've added even more features that simplify your workflow, make you more efficient and adapt to how you work, and all of this with a lifecycle and digital ecosystem that delivers value.

Welcome to a big update for Voluson SWIFT, that makes your everyday easier. See new features that enhance image quality for even more resolution and an expanded set of AI tools that deliver a new level of simplicity and efficiency. You asked for a better, more affordable way. The answer is simple.

**NEW – Breakthrough 23**

**This is  
Voluson™  
SWIFT**

### Available features:

- 18.5" High Resolution Touch Monitor
- Lightweight and maneuverable
- Voluson Core Architecture
- Menu personalization – reduce distraction and optimize workflow
- Sleep Mode –Fast Wake
- Battery Pack

# Cardiovascular Ultrasound

The **Vivid™ Ultra Edition\*** is a comprehensive portfolio of cardiovascular ultrasound systems enabling you to achieve clinical excellence with advancements in visualization, navigation, quantification and automation.

\* Ultra Edition is not a product name, it refers to the 2022 release of the Vivid portfolio.

## AT A GLANCE:

**GE HealthCare  
Vivid**

**Vivid Club**

# Vivid E95 Ultra Edition

Powered by AI, elevated by you

Premium 4D cardiovascular ultrasound system designed to provide you with uncompromised image quality, advanced visualization capabilities and easy measurements – while helping reduce tedious tasks and inter-observer variability.<sup>1</sup>

Be empowered with the expanded advantages of artificial intelligence and achieve accurate, reproducible<sup>1</sup> and high-quality exams quickly and easily. An impressive experience awaits you. The vital work you do with patients every day is the inspiration of the Ultra Edition. AI, powered by the GE HealthCare Edison™ platform, and the extraordinary processing capacity of the cSound™ imaging architecture empower these new innovations. Work efficiently and comfortably with familiar, yet modern and efficient designs that help you streamline exams.

**Your time is precious. Save it.**  
The Vivid™ E95 Ultra Edition introduces new AI-based technology to help reduce tedious tasks and improved workflow.<sup>1</sup>

# LOGIQ E10

Ultrasound imaging for Today. Digital platform for Tomorrow.

Today the **LOGIQ™ E10 (R3)** stretches even more its leadership performance with extended specialty tools and imaging capabilities. Leveraging the heritage of a long history in ultrasound, the LOGIQ E10 embraces digital transformation to deliver innovative solutions in any care area and empowers you to improve clinical, financial, and operational outcomes.

This Release of the LOGIQ E10 provides a new standard in imaging, advanced tools, and enhanced workflow productivity so you can scan, diagnose, and treat a wide range of patients across a broad spectrum of conditions. Central to the new system is the cSound™ Architecture that combines versatile XDclear™ probes and the new cSound Imageformer to deliver exceptional image quality.

Powered by an advanced graphics processing unit (GPU), the LOGIQ E10 acquires and reconstructs data with 48x the data throughput and 10x the processing power of our previous systems.

There's no need to adjust the focus – the information you need is there, instantly. With the LOGIQ E10, you will see more detail, much faster than before. The next-generation LOGIQ E10 system is leading a digital transformation in ultrasound. It is the 'A to A' platform, exploiting Awareness to deliver Assistance and improving imaging for patients from head to toe, no matter their age or body habitus. LOGIQ E10 is designed for you – so you can make confident diagnosis using comprehensive tools and achieve a new standard of concise workflow – and you can drive innovation, setting the pace for the Care of tomorrow.

# LOGIQ E10s

Ultrasound imaging for Today. Digital platform for Tomorrow.

The **LOGIQ™ E10s (R3)** is the Next-Gen leadership platform in the General Imaging portfolio, delivering high performance for Every Day Use, with enhanced scalability.

Leveraging the heritage of a long history in ultrasound, the LOGIQ E10s embraces digital transformation to deliver innovative solutions in any care area and empowers you to improve clinical, financial, and operational outcomes. The LOGIQ E10s exploits proven technologies from the LOGIQ E10, maximizing your clinical confidence in daily routine. Central to the new system is the cSound™ Architecture that combines versatile XDclear™ probes and the new cSound Imageformer to deliver exceptional image quality, as on the LOGIQ E10, within a Smart Investment.

The next-generation LOGIQ E10s system is also leading a digital transformation in ultrasound. It is the 'A to A' platform, exploiting Awareness to deliver Assistance and improving imaging for

patients from head to toe, no matter their age or body habitus. The new release will expand its performance in care areas as musculoskeletal, breast, superficial imaging, liver, urology and pediatric.

LOGIQ E10s is scalable, designed for you – so you can make confident diagnosis using comprehensive tools and achieve a new standard of concise workflow every day.

# LOGIQ Fortis

## Expand your potential

The next-generation **LOGIQ Fortis™** supports your aspirations, adapts to your needs, delivering on the promise of confident care.

Everything you expect in a LOGIQ™ system - powerfully streamlined. With a sleek and compact design, LOGIQ Fortis can be used in almost any space. Its state-of-the-art features and technologies make it strong enough to conduct a full spectrum of ultrasound exams and procedures on any body type. It was specifically designed to optimize clinicians' productivity, exceed expectations regarding performance, and to maximize your investment.

The LOGIQ Fortis is the Powerfully Streamlined Premium ultrasound system featuring the proven cSound™ technology of the LOGIQ E10 Series. It is an all-in-one ultrasound solution with exceptional image quality to meet your needs and expand your potential across a wide variety of clinical exams and procedures.

Characterized by strength, it gives you the power to enhance your clinical capabilities and increase productivity exponentially. Powerful and easy, beyond any expectation and across any challenge, the LOGIQ Fortis is tailored on the needs of a multi-purpose imaging department, with no compromise on an easy to reach performance at a very realistic budget. Adaptable, with a variety of specialty tools and AI-based solutions expanding your potential. And Reliable, today into tomorrow, as a sustainable and durable investment you can trust.

### Available features:

LOGIQ Fortis is characterized by both its **strength** and its **power**. It gives you the power to enhance your clinical capabilities and increase productivity exponentially.

# LOGIQ P10 XDclear

Make it easy. Make it your own.

The new **LOGIQ™ P10 XDclear™** is moving mid-range ultrasound into entry premium delivering advanced performance at an affordable budget.

This mobile and shared service system can first answer the need of a quick diagnostic exploration and quick schedules being easy to use and enabling fast exams through customizable user workflow and productivity tools. At the same time, it delivers high level imaging and advanced specialty tools to allow deeper

investigations and a comprehensive patient care management in a multi-purpose or specialty environment. The LOGIQ P10 XDclear features XDclear probes and imaging solutions migrated from the leadership systems.

It is the choice for a system enabling a Personalized workflow, Patient-centric diagnostic-capabilities and backed up by a Powerful support.

Personalized workflow	Patient-centric	Powerful support
Personalized Set-Up Tools to customize workflow and preferences with Start Assistant, MyPage and MyPreset	P-Agile Acoustic Architecture	Tricefy® Cloud based storage
Automated scanning tools to reduce exam time and increase user efficiency as CTO, AutoEF, Auto IMT and Assistant packages	Extensive portfolio of transducers, including new XDclear™ probes	SonoDefense solution, for advanced cyber security
AI-Based tools, harnessing artificial intelligence for imaging standardization and speed	New Advanced SRI, CrossXBeam, B-Steer+, LOGIQ View	MyTrainer, self-training modules available onboard
Intuitive User Interface, with customizable keys, joysticks and touch controls	Contrast Enhanced Ultrasound with HiRes	Data management tools
Excellent mobility, easy to transport and with Power Assistant for offline scanning	B-Flow, HD Color	LOGIQ Club, on demand educational resources
GE Raw Data	Strain Elastography with semi-Quantification	Breast Assistant package Powered by Koios DS™ AI-based tool
	2D-Shear Wave Elastography on convex linear and endocavitary probes	
	UGAP, for steatosis grading	
	3D/4D Volume Ultrasound with new HDlive™, STIC, OmniView and SonoRenderlive	
	Anatomical M-Mode, TVI, TVD, Cardiac Strain	

Tricefy trademarks are registered trademarks of Trice Imaging, Inc.

# LOGIQ P9 XDclear

Make it easy. Make it your own.

The new XDclear™ Release of the LOGIQ™ P9 is taking the performance of this successful mid-range ultrasound to the next level.

This mobile and shared service system has been originally designed for quick diagnostic exploration and quick schedules being easy to use and enabling fast exams through customizable user workflow and productivity tools. The Release features new XDclear probes and imaging solutions elevating the imaging performance while expanding to a wider range of applications.

LOGIQ P9 XDclear is the choice for a system with a Personalized workflow, Patient-centric diagnostic capabilities and delivering a Powerful support.

Personalized workflow	Patient-centric	Powerful support
Personalized Set-Up Tools to customize workflow and preferences with Start Assistant, MyPage and My Preset	P-Agile Acoustic Architecture	Tricefy® Cloud based storage

# Point of Care Ultrasound

We're dedicated to developing ultrasound systems that are accessible to all to help make assessments simple, clinical decision support fast and treatment precise.

## AT A GLANCE:

**GE HealthCare  
Point of Care**

**POCUShub**

# The Venue Family

## Made for Your Point of Care

GE Healthcare's **Venue™ Family** of AI-enabled Point of Care systems are adaptable, intuitive and easy to clean. Made for Your Point of Care spaces and environments with heightened infection control requirements.

Designed to simplify the complex, our automated and advanced clinical tools enable fast assessments, support your life-saving decisions, and help monitor patient progress even in unpredictable, chaotic environments.

AI tools help drive consistency from user to user, whether you are an ultrasound novice or an expert, there's a Venue Family system to fit your needs.

### Auto tools for many applications

-  Utilizes proprietary algorithms
-  Data synthesized from numerous patients
-  Helps with accurate calculations for clinical confidence

### Work smarter, not harder

Precise AI tools are designed to enable fast patient assessments and confident decisions. Utilizing proprietary algorithms, we synthesized patient data to ensure accurate calculations for clinical confidence.

### Shared platform

One common platform gives users the same experience regardless of system being used and enables facilities to simplify their training protocols.

### Touch, pinch, swipe

No buttons. No knobs. A familiar touch screen with a simple, clear and intuitive interface works even with gloves or screen covers.

### Infection control

Easy to clean, smooth and seamless surface supports infection control efforts.

### Probes up top

Easily access probes and keep them in good condition with smart cable management that puts probes safely up top and cables out of the way to ensure durability.

### Cart to table to wall

Uniquely adaptable, Venue Go's exclusive cradle enables the system to go from cart to table to wall to accommodate common procedural environments. Venue Fit offers cart, kickstand or VESA® connection options.

### Moves with you

Easily maneuver the system to the bedside or in tight spaces. A sleek footprint and big wheels make the Venue Family durable and nimble enough to move alongside you.

### Battery powered

Equipped with long-lasting batteries that provide active scan times of up to 4 hours (Venue), 2 hours (Venue Go) or 1 hour (Venue Fit). All Venue Family systems have an easy to see count-down timer that changes color when you are running low.

### Built for durability

Screens durable enough to withstand bumps, bangs and splashes, will never hit the wall thanks to the bumpers and multipurpose handles on the systems.

# The Venue Family

Made for Your Point of Care

## Venue™

### Up to four-hour battery

Easy-to-see countdown timer changes color when you are running low

### 19-inch articulating monitor

See the image across the room. Ideal for teaching and training purposes; reposition it for procedures

### Designed for cable management

4 probes connected. Easily access probes and keep them in good condition with smart cable management. That puts probes safely uptop and cables out of the way to ensure durability

### Seamless flat display

Enables thorough cleaning to support your infection control efforts

### Moves with you

A small footprint with large casters easily maneuver the system to the bedside, navigate between equipment and reach tight spaces common in point of care

### Full-screen mode

Simple user interface

### Cardiac assessment

TEE and ECG functionality

### Backed by a multi-year warranty

Support you can count on

### Button probe

Allows you to directly control the system and simultaneously hold a needle

### Work harder not smarter

Precise tools are designed to enable fast patient assessments and confident decisions. Utilizing proprietary algorithms, we synthesized patient data to ensure accurate calculations for clinical confidence

**Simple. Fast. Precise.**

# The Venue Family

Made for Your Point of Care

## Venue Go™

### Up to two-hour battery

Easy-to-see countdown timer changes color when you are running low

### 15-inch monitor

Sized for the environment and designed for easy repositioning and simple transport

### Designed for cable management

3 Transducers connected. Probes on top keep cables off the ground

### Seamless flat display

Enables thorough cleaning to support your infection control efforts

### Uniquely adaptable

Exclusive cradle enables system to go from cart to table to wall, Offers cart, kickstand or VESA® connection

### Multipurpose handle

Raise and Lower with ease

### Ready where you are

Customizable LED indicators help ensure availability status

VESA is a registered trademark of the Video Electronics Standards Association.

### Full-screen mode

Simple user interface

### Cardiac assessment

TEE and ECG functionality

### Backed by a multi-year warranty

Support you can count on

### Button probe

Allows you to directly control the system and simultaneously hold a needle

### Work harder not smarter

Precise tools are designed to enable fast patient assessments and confident decisions. Utilizing proprietary algorithms, we synthesized patient data to ensure accurate calculations for clinical confidence

**Simple. Fast. Precise.**

# The Venue Family

Made for Your Point of Care

## Venue Fit™

### Up to one-hour battery

Count-down timer changes color when you are running low

### 14-inch monitor

Sized for the environment and designed for easy repositioning and maneuverability

### Designed for cable management

Two Transducers connected. Probe safely uptop and cables out of the way

### Seamless flat display

Easy to clean, smooth and seamless surface supports infection control efforts

### Uniquely adaptable

system to go from cart to table to wall. Detachable holders and bins allow you to configure the system cart to fit your needs

### Simple screen mode

Simple user interface

### Backed by a multi-year warranty

Support you can count on

### Button probe

Allows you to directly control the system and simultaneously hold a needle

Simple. Fast. Precise.

# LOGIQ™ e

Simple. Fast. Precise.

## Challenges in Point of Care

**Acute intervention. Chronic patient management. Needle guidance.**

Action-oriented patient care. When physicians who use ultrasound at the point of care met with GEHC scientists, they asked for a system designed for immediate-action workflow, bright-room operation, and precise guidance... throughout the facility.

### Features included as standard

- |  |  |
|--|--|
| Patient Follow-up Tool                           | B-mode image, Color Doppler, PW Doppler, Tissue Doppler imaging, and slow-flow Power Doppler Imaging (PDI) sensitivity |
| Fusion   | TruScan raw data processing  |
| PDI Quantification                               | Intuitive presets by procedure and body part   |
| Raw Data   | Weight: Less than 4.5 Kg   |
| Needle Recognition with gain                     | Battery-operated, independent of main power supply   |
| Ultra-high frequency 10-22 MHz linear transducer | Internal image archiving or via wireless LAN   |

Invenia ABUS 2.0 >

# ABUS Breast Imaging

**Invenia™ ABUS 2.0** is the first FDA-approved ultrasound supplemental screening that is specifically designed for detecting cancer in dense breast tissue.

AT A GLANCE:

GE HealthCare  
Invenia ABUS

ABUS Club

# Invenia ABUS 2.0

## Clinical solutions

### The unseen risk – too many tumors are missed in dense breasts

Over 40% of women have dense breast tissue<sup>1</sup>, which can mask the appearance of tumors and limit the performance of mammography. Mammography may miss over 1/3 of cancers in dense breasts<sup>2</sup>. Having dense breasts increases a women's likelihood to develop cancer four to six times<sup>3</sup>.

### Enhanced detection – Invenia™ ABUS contribute to find more cancers

Screening with ABUS has shown a relative increase in cancer detection rate of 57% by keeping an almost stable recall rate of 2.3%.<sup>4</sup> Early cancer detection enables less invasive treatment, lower morbidity and reduced treatment costs.

### Enhanced diagnosis and more

Accurate, cost-effective and non-invasive staging of breast-cancer due to the global view of the breast<sup>5</sup> and easy comparison to priors are streamlining the bilateral breast evaluation, also for monitoring.

1. Tabár, L., Vitak, B., et. al. Swedish Two-County Trial: Impact of Mammographic Screening on Breast Cancer Mortality during 3 Decades Radiology: 2011 260:3, 658-663.
2. Mandelson et al. Breast density as a predictor of mammographic detection: comparison of interval and screen-detected cancers. J Natl Cancer Inst 2000; 92:1081-1087.
3. Boyd, N.F., Guo, H., et. al., Mammographic Density and the Risk and Detection of Breast Cancer N Engl J Med 2007, 356 (3): 227-236
4. Wilczek, Leifland, et.al. Adding 3D Automated Breast Ultrasound to mammography screening in women with heterogeneously and extremely dense breasts. Report from a hospital-based, high-volume, single-center breast cancer screening program. European Journal of Radiology 85 (2016) 1554-1563

# Handheld Ultrasound

The **Vscan™ family** delivers portable, pocket-sized ultrasound systems to enable clinicians to easily image patients at the point of care – transforming the physical exam with more information to determine the optimized course of treatment.

AT A GLANCE:

**Vscan Rocks**

# Vscan Air CL

## Curved array and linear array dual-probe

### See more. Treat faster.

Take Vscan Air™ CL anywhere\* with wireless freedom and maximum portability. One device delivers the value of two: the curved array transducer is ideal for abdominal imaging, obstetric assessments and more, and the linear array is ideal for vascular, MSK, lungs and more. Complete both shallow and deep scans with one device without compromising image quality.

Built for both new and experienced ultrasound users with basic and advanced assessments in mind.

B-mode

Pulsed Wave Doppler

Color Doppler

M-mode

### Break free

Its small, lightweight and wireless dual-probe provides you with a convenient, durable and flexible handheld ultrasound solution.

### By your side

We support your ultrasound journey from first scan to confident use. Make the most of your system from the easy-to-use probe and intuitive app to GE HealthCare's renowned service and educational tools. Vscan Air CL comes with a 3-year worry-free warranty.

### Clear images, informed decisions

Engineered with SignalMax™ technology, Vscan Air CL delivers sharp images to support early assessments and help monitor treatment.

OB measurements and worksheet include capabilities for fetal size measurements, amniotic fluid check, angle of progression and estimated fetal weight.

\* The device has been verified for limited use outside of professional healthcare facilities. Use is restricted to environmental properties described in the user manual. Please contact your GE HealthCare sales representative for detailed information.

### Securely store, share and collaborate

#### Flexible wireless dataflow:

DICOM®, including query from Modality Worklist server, Store to DICOM PACS, receive Storage Commitment

# iCenter and MyGEHealthCare app

## Fleet Performance Management

Take advantage of our advanced digital services, iCenter™ and the MyGEHealthCare app.

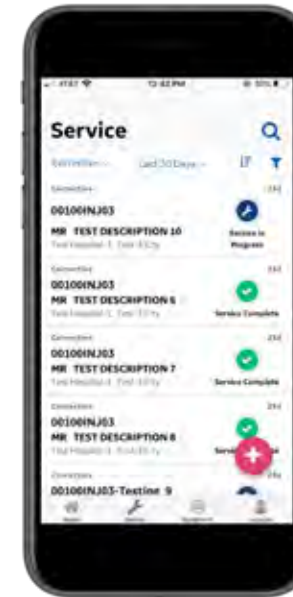

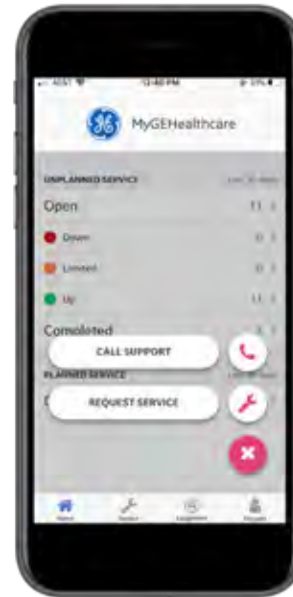

These help you make informed decisions at the right time, improve efficiency and ultimately reduce costs for your department.

### iCenter

is a secure, cloud-based asset management tool. It provides on your medical devices' operational status with dashboards and reporting.

### MyGEHealthCare app

is the mobile app version of iCenter with the ability to create service requests 24/7, and get real time notification.

- Be aware 24/7 of the maintenance status
- Enable compliance for audits
- Manage your inventory by checking asset's reliability
- Create a service request

MyGEHealthCare app

Fleet Performance Management

# Ultrasound Excellence

## Fleet Performance Management

### Ultrasound Excellence

is a neutral (GEHC & non-GEHC) analytics solution, which consolidates the usage data of your Ultrasound systems across your hospital into powerful and intuitive dashboards to help you make data-driven operational and financial decision.

It aims to improve the understanding and use of ultrasound equipment. With Ultrasound Excellence, you can monitor the usage of your ultrasound fleet to leverage its best performance and ensure you make right decisions operationally, clinically and financially.

### Monitor and optimise your ultrasound activity

### Optimise your ultrasound fleet performance

- Evaluate your probe and equipment
- Manage your ultrasound investment and costs
- Optimise your consultation flow
- Pay per use

### Why is it useful?

By connecting all your Ultrasound devices, regardless of manufacturer.

By collecting and analysing your activity data using indicators that are pertinent for your business.

By transforming this data into actionable insights with the support of our expert Customer Success team.

Connect,  
Measure &  
Optimize

Operational  
Management

# Options & Upgrades

## Evolution

As part of the GE HealthCare Family, we want to make sure you protect your investment and stay ahead of the curve in terms of innovations that will help you achieve more for your patients. This is why we have different upgrades in our portfolio available for our wide range of products.

### Options and Upgrades

- An upgrade of your ultrasound system from your original release to the new release
- It includes new features: clinical, productivity, new probes...
- It needs to be installed by a field engineer on site
- Some packages involve options and can also be bought on-demand
- Can be added to your contracts

Keep your ultrasound system up-to-date with the latest clinical applications

Protect your investment

Stay ahead of curve in terms of innovation

Evolution

# Probe Hygiene

## Care & Hygiene

### Probes

are key and expensive elements of the ultrasound chain but also the most sensitive.

Probes should be used with caution, examined before and after each procedure, handled, cleaned and disinfected following the proper procedures. This is to ensure optimal functioning so that the proper diagnosis can be established. Benefit from educational content, care & hygiene support, as well as service and product recommendations, by taking the best possible care of your multi-brand probes and thus extending their lifetime.

**Education on system and Probe hygiene solutions:**  
probe care course, care cards, webinars and filters cleaning tips

**There are Probe hygiene solutions:**  
cleaning, disinfection, transport, storage and testing

Guarantee an optimal care for patient

# Ultrasound IT

**ViewPoint™ 6** is a customer-focused, user-friendly and highly customizable image management and reporting system for different care areas including Women's Health, Cardiology and Internal Medicine.

The system enables streamlined digital integration and an optimized workflow experience. It also allows data to be stored digitally for easy access so that users can review exam findings, images, clips, and volumes in one place. ViewPoint 6 is based on 30 years of customer feedback and collaboration with leading medical societies.

\* Manufactured by: Trium Analysis Online GmbH, Hohenlindener Str 1, Munich, Germany.

## AT A GLANCE:

**Ultrasound  
Reporting**

**LOGIQ Club**

**Voluson Club**

**Vivid Club**

# ViewPoint 6

## for Women’s Health

### ViewPoint™ 6

helps you minimize the time spent on documentation. Ultrasound images, measurements and findings can be displayed in one view.

Measurement data trends are shown in graphs of individually selectable authors. Settings can be synchronized with those of the ultrasound system. Risk calculations<sup>1</sup> according to the Fetal Medicine Foundation (FMF) London can be performed and graphically displayed.

ViewPoint 6 uses diagnostic terminology developed in scientific cooperation with medical societies. With the integrated 4DView, 3D and 4D data from GE HealthCare Voluson™ devices can be post-processed and saved.

- Simple and fast report creation
- Diagnostic support
- Post-processing of Voluson 3D/4D data using integrated 4DView

### Available exam types:

Obstetrics	Gynecology	Mammasonography	Maternity <sup>2</sup>
Ultrasound 1st trimester	Pelvic ultrasound	Breast ultrasound including BI-RADS® classification	Antenatal booking
Ultrasound 2nd and 3rd trimester	Genetic counseling		Intrapartum
Growth scan	Colposcopy		Post delivery exam
Fetal wellbeing			Discharge
Invasive procedures			
Pregnancy outcome			

<sup>1</sup> Not available in all countries  
<sup>2</sup> Only available in German speaking countries

BI-RADS is a trademark of the American College of Radiology

# Trium CTG Online<sup>1</sup>

## for Women's Health

### Trium CTG Online

allows you to keep track of all CTG traces, provides decision support, digital archiving and exchange of delivery data for documentation purposes.

ViewPoint™ 6 can be linked to Trium CTG Online.

- Display of CTG traces
- FIGO and STV analysis
- Archiving & validation
- Partogram

### Key features

#### Centralized and decentralized CTG monitoring

Survey up to 16 fetal monitors concurrently on one screen

Integrate up to 64 fetal monitors into centralized fetal surveillance

Access all patient information, annotations and alarm settings from all stations in the network

#### Intelligent decision support

Alarm based on CTG pattern recognition (according to FIGO<sup>2</sup>)

The partogram visualizes the labor progress and the mother/fetus status in one screen, allowing for faster and more confident decisions

#### Comprehensive documentation

Clinic specific annotations allowing for faster and more comprehensive documentation

All annotations are authenticated and dated automatically

Documents can be stored as PDF/A for long term electronic archiving compliant with ISO 19005-1:2005

#### Easy integration

Integrates into the hospital IT infrastructure and backup architecture

No client software installation is needed through a webbased interface

Fetal monitors get connected via existing local network (LAN or wireless LAN)

Integration in Hospital Information Systems via HL7

<sup>1</sup> Manufactured by: Trium Analysis Online GmbH, Hohenlindener Str 1, Munich, Germany.  
<sup>2</sup> Not available in all countries.

# ViewPoint 6

## for Cardiovascular

### ViewPoint™ 6

for echocardiography combines efficient exam documentation including automated measurement transfer with image management tools like the integrated EchoPAC.

With the EchoPAC Plug-in, raw data from GE HealthCare Vivid™ systems can be post-processed and archived.

With the ViewPoint 6 vascular module, a wide range of vascular examinations can be efficiently documented. All measurements are clearly displayed.

#### Available exam types:

##### Echocardiography

TTE

TEE

Pediatric TEE

Pediatric TTE

Stress echo

##### Vascular Ultrasound

Extremity venous

Bypass graft

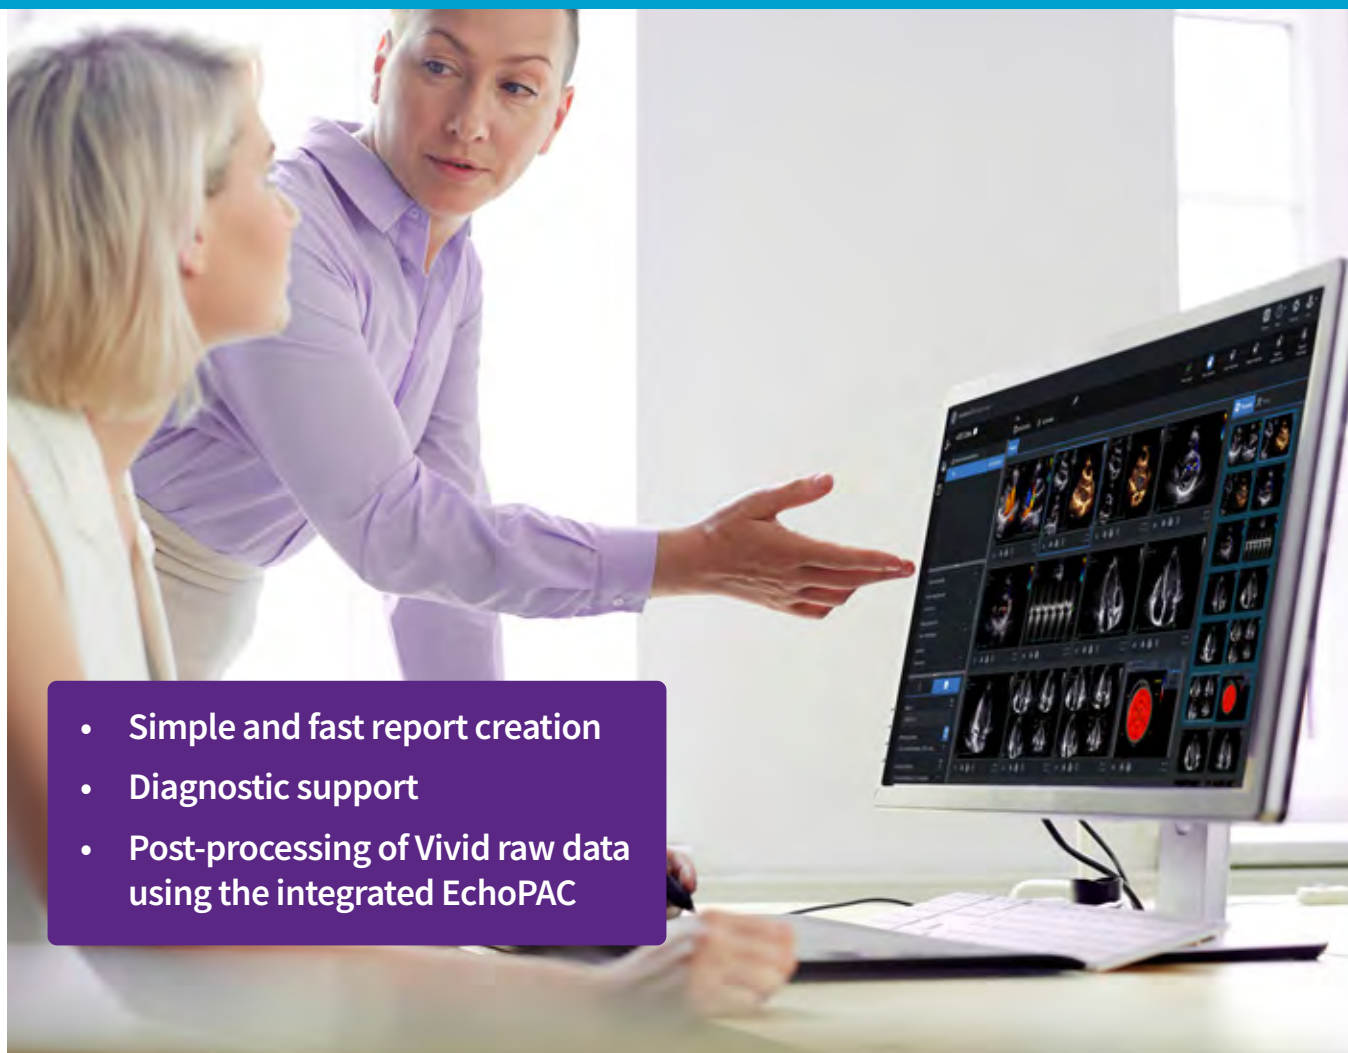

Dialysis access

Peripheral arterial

Liver/kidney/pancreas

Transplant ultrasound

EVAR

- Simple and fast report creation
- Diagnostic support
- Post-processing of Vivid raw data using the integrated EchoPAC

# ViewPoint 6

## for Internal Medicine

### With ViewPoint™ 6

for abdominal and small parts ultrasound examinations, hospitals and private practices can perform structured and standardized documentation that can be entered quickly and meets the special requirements of this application.

Beyond ultrasound documentation, ViewPoint 6 allows to create specialized reports for a variety of endoscopy exams<sup>1</sup> performed in a gastro-intestinal department. Images can be transferred automatically from the endoscopy device to ViewPoint 6.

#### Available exam types:

##### Abdominal and small parts

Abdominal ultrasound

Head/neck ultrasound including thyroid

##### Endoscopy<sup>1</sup>

Gastroscopy

Colonoscopy

ERCP

EUS

Enteroscopy

Capsular Endoscopy

Bronchoscopy

- Simple and fast report creation
- Available for ultrasound and endoscopy exams

<sup>1</sup> Only available in German speaking countries

## GE HealthCare

is a leading global medical technology, pharmaceutical diagnostics, and digital solutions innovator, dedicated to providing integrated solutions, services and data analytics to make clinicians more effective, therapies more precise, and patients healthier and happier. Serving patients and providers for more than 100 years, GE HealthCare is advancing connected and compassionate care, while simplifying the patient's journey across the care pathway. Together, we're creating a world where healthcare has no limits.
